How to Use the Mental Health Resources Card

The Mental Health Resource Card is an editable handout for you to include contact information for each organization on the Local Resources side. Many local mental health organizations are part of national resources. You can find your community organizations through the locator on the data bases on these websites. We've included links to find your local organizations.

On the flip side of the card are National Resources that address many of the concerns people in your community may have. Jewish and secular resources are included. Many organizations make referrals free of charge.
